Community Scholars-In-Residence Program

Cancer Prevention and Control

University of Pennsylvania

Applications are now being accepted for the Community Scholars-in-Residence program which will be focused on cancer prevention and control research.

Through this program, scholars will develop relationships with a community research partner of their choosing, identify research opportunities, and co-develop research projects during a one to two-year tenure with a community partner organization.

Eligibility: Standing pre/post docs with an interest in conducting community-engaged health research

Project Topics: Projects must focus on cancer prevention and control research, and must be co-developed with a community partner

Program Duration: 12-24 months

Funding: Each Scholar/Community Organization team will receive up to \$5,000 for their project

Program Start: September 2018

Application Deadline: June 1, 2018

Please contact Jill McDonald at jillmcd@penmedicine.upenn.edu with any questions

Funding for this program comes from Community Engagement and Research Core in the Penn CTSA and the UPenn Cancer Prevention and Control Research Network (CPCRN).
